Summary

In the projects where I work as an Analyst Developer, I actively take part in project management processes, primarily focusing on frontend development. I develop user-friendly interfaces using modern technologies such as React, Next.js, and Apollo Client, and am responsible for implementing modules like content management panels and payment systems. I have gained experience in projects across various industries, including Tami, PayTR, Lujo Hotel, and ATP GreenX. I am a team-oriented, solution-focused, and eager-to-learn software developer. As a Frontend Developer who enjoys discovering and learning new technologies, I primarily work with React, Next.js, and Node.js (Express).

Professional Experience

09/2024 – 03/2025

Remote, Türkiye

Frontend Developer

Taze Bilgi Teknolojileri (TazeBT)

- I played a key role in frontend development processes and increased user engagement by developing modern user interface components. I worked as a Front End Developer in projects across various industries, including Tami, PayTR, Lujo Hotel, and ATP GreenX, gaining experience in developing responsive web projects.
- I actively contributed to the development of the CMS panel.

09/2024

Remote, Türkiye

Frontend Web Developer

PeoplePerHour

03/2024 – 07/2024

Remote, Türkiye

Front-end Web Developer

Patika.dev

- I received hands-on training in HTML, CSS, JavaScript, React, Git, and responsive design during an intense 6-month bootcamp. By developing projects based on real-world scenarios, I improved my teamwork, version control, and problem-solving skills.

07/2023 – 12/2023

İzmir, Türkiye

E-commerce Manager

Sasso Young

- I optimized the product catalog and improved sales processes, resulting in a 30% increase in conversion rates on the e-commerce platform. Additionally, I was involved in setting up store and product pages on various e-commerce platforms.

06/2020 – 11/2022

İzmir, Türkiye

Co-Founder

Miel & Miel

- I co-founded a company and gained experience in e-commerce. I managed product sourcing, marketing strategies, customer relations, and sales processes. I developed skills in digital advertising, SEO, and e-commerce platform integrations.

09/2019 – 01/2020

İzmir, Türkiye

Marketing Intern

Yalı Spor

Education

03/2024 – 08/2024
Remote, Türkiye

Patka+ Frontend Web Development Bootcamp
Patika.dev

2016 – 2020

CAREER GOALS & INTERESTS

I am passionate about becoming a Full Stack Developer by expanding my expertise in both frontend and backend technologies. Currently, I am enhancing my skills in React Native, Node.js, and Java, with a focus on backend development. Additionally, I am deepening my knowledge of design patterns, microservices architecture, and SQL to build scalable and efficient systems. My goal is to combine my frontend experience with backend proficiency to deliver end-to-end solutions that drive user satisfaction and business growth.

Projects

Tami

- I played an active role in frontend development for the Tami project, developing and implementing UI components, which improved site performance and increased user engagement.

Lujo Hotel

ChatGPT:

I contributed to the design and development of Lujo Hotel's new website, focusing on mobile-first design and responsive layouts, which enhanced user engagement.

Atp GreenX

- I contributed to the frontend development of the ATP GreenX platform, optimizing the platform for carbon certificate trading and improving transaction speed. I integrated CMS functionalities for managing user profiles, transaction records, and platform settings, enhancing content management efficiency.

PayTR

- I participated in the development of PayTR's website, optimizing frontend functionalities for online payment solutions, which increased the transaction success rate by 10%. By integrating CMS features for managing content, transaction records, and payment services, I reduced content update time by 30%.

Smart Edu

- A full-stack educational portal built with Node.js, Express, MongoDB, and EJS. The platform offers user authentication, course management, and email notifications. Developed features include course categorization, user dashboards, and dynamic page rendering. Technologies such as bcrypt for secure password hashing and Nodemailer for email integration were used.

PCAT Photo App

- Technologies: Node.js, Express.js, MongoDB, EJS, Render, RESTful API, MVC Architecture
- PCAT is a web application that allows users to upload, manage, and organize their photos. It is built using Node.js and Express.js, with MongoDB Atlas for data management. The frontend is powered by the EJS template engine, providing a dynamic and user-friendly interface.

Video Call App

- Video Call App is a real-time video conferencing application that allows users to create or join video call rooms. The app gives users full control over their camera and microphone settings. Built with React 19 and React Router v7.5, it provides a seamless navigation experience, while ZEGOCLOUD's prebuilt UI kit is used for managing live video communication. Interactive alerts are handled with react-confirm-alert, and react-icons enhances the UI with modern icons.

Sport Center

- I expanded a responsive website for a sports center using HTML, CSS, and JavaScript, offering a modern user experience and seamless navigation.

Cryptocurrency Tracker

- I developed a web application to track and manage cryptocurrencies using the CoinGecko API. Users can view current prices, historical data, and related news, which enhanced the platform's user engagement.

E- Commerce Website

- I developed a dynamic product catalog application using Vue.js 3, Vue Router, Pinia, Axios, Tailwind CSS, and Vite.

Star Wars App

- I developed an application using React.js and Axios to display detailed information about Star Wars starships. I integrated the Context API for state management and data fetching.
